FEED ROLL REPLACEMENT TIPS

Our feed roll replacement tips are manufactured from a high quality hard chrome alloy, that exhibits excellent wear resistant qualities. Hard chrome alloy will out perform heat treated steel by a factor of 5 or more!

- Debarker feed rolls
- Log turner rolls.
- Log haul chain attachments

The tips are available in 7 sizes, including the Log Saver style to reduce severe piercing or penetration.

They are packaged in boxes of 100.

Loose Type
102 Tips

Tips shown fitted
to a feed roll (or
pineapple roller).

Welding Recommendations:

Use a stainless steel 309 grade rod or wire.

Preheat the base material temperature to approx 150 deg Celsius.

Since practical operating conditions do not always correspond to the conditions of testing methods, most values should be considered as an indication only and not as a basis for calculations since allowance must be made for real operating conditions. All information is given in good faith but without warranty.
