

ENGINEERING SERVICES

AT A GLANCE

SUPPLY SERVICES

SUPPLYSERVICES.CO.NZ | 0800 102 112

All three of our nationwide branches offer CAD design, manual and CNC machining services; all are fully stocked with engineering plastics, chains, sprockets and associated parts.

- Computer Aided Design (CAD)
- CNC turning (2 & 4 Axis)
- CNC milling (3 & 4 Axis)
- CNC routing (3 & 5 Axis)
- Conventional turning & milling
- CNC billet cutting
- Production keying
- Thicknessing
- Custom profiles
- Cut to size rod, tube & sheet
- Plastic fabrication
- Plastic & metal welding
- Magnetic particle inspection NDT
- Portable CMM inspection system

CAD

We can manipulate your CAD models and drawings or create them for you from your parts or sketches. If required, we can design your parts from scratch.

Our CAD engineers are able to design complex parts and assemblies from our range of engineering materials that are in use across all industry sectors. They even design sprockets and bottling line change parts.

Conventional & CNC machining

Our three machining shops located across New Zealand is where the magic happens.

As well as conventional turning and milling capabilities, we have skilled CNC operators who can turn your material or idea into components. Our machine shops can make finished parts from any of our engineering materials or composites.

Cut to size plastics

Plastic rods, tubes, sheets and films- we have every size, grade and type of engineering plastic available from leading global manufacturers. We can provide off-the-shelf or manufactured parts to your specifications.

We also stock a comprehensive range of specialist OEM plastic products for the wood processing industry. No matter where you are in New Zealand, we're right there with you.

Full Service

Start to finish,
nationwide.

SUPPLY SERVICES
performance engineering products

Reverse engineering

Give us your part and we'll recreate it, even if its broken or worn out.

We've invested heavily in technology and training to help our customers replace old parts with new ones. We can hard probe or use contactless 3D laser scanning techniques to digitise your component and reverse engineer it, and then in the machine shop make the parts.

Welding, Assembly & Fabrication

We work across all industry sectors manufacturing high quality parts, fabricating and assembling them at our site to reduce interruption to your production.

Inventory & Warehousing

Do you need a regular supply of components but have nowhere to store them?

We can manufacture your parts, stock them in our secure warehousing facilities and dispatch when you need them, charging you as you go.

Our end-to-end procurement, storage and installation service eases cashflow and ensures your parts are on hand when you need them.

No matter where you are in the country, we have the people and the know-how to help you out.
